

*"If you touch the mathematical elements in a design, beauty appears."*

Marc De Groot

# Helix Light

Size:

ø 32 x 28 cm

ø 50 x 45 cm

ø 105 x 90 cm

ø 75 x 65 cm

ø 165 x 140 cm

*Mathematical elements are the essence of beautiful design*

The Helix uses just one basic geometric form and an ingenious enigmatic pattern to create an innovated and beautiful modern form referring to the classic industrial lights.

The unique design of the Helix originates of a mathematical theory by Fibonacci. By re-inventing this mathematical theory, Marc was able to create natural beauty out of simplicity and a natural pattern.

Diameter: 32, 50, 75, 105, 165 cm\*

**\*white powdercoat, aluminium and brass** (different powdercoat are available on request)
